Stock Market Letters.

Stock Market Letters.

James A. Pollock & Co., stock and grain brokers, 6 West Second South street, make public the following letters on the stock market:

Marshal Spader & Co., New York, say:
"The market developed a fair degree of strength today, but with restricted trading, and the advances secured were not significant of more than casual outside interest and perhaps even less support from larger operators. The size of the crops and their value, the increase in gold circulation and banking facilities, while not lost sight of, perhaps is not permitted to have full value in such calculation. We continue to believe the strength of security list assured in nearly all directions."

Logan & Bryan, New York, say: "The market is closing strong and higher. The action of Erle directors in placing the second preferred stock on a 4 per cent basis evidently meets with the approval of investing public. The beneficial rains throughout the corn beit add much to the better feeling. The situation seems unchanged to us. The leading operators being away, the rank and file of traders, as a rule, still seem inclined to favor the bull side."

Hutton, New York, says: "Two strong factors in the present stock market eltuation which have materialized since the end of last week are perfect weather conditions for crops and the great activity in steel and iron industry. The factors have been so marked that big interests are not selling a share of stock and from operations today it would appear as if the buying of a very excellent character had begun again. Stocke seem high enough to us at present level, but there are two elements which can create a speculative market later on, one is the possibility of railroad deals, and the other the distribution of assets of Northern Security company. If they should declare a large cash dividend to the holders of common, Union Pacific will likely sell in the vicinity of 150. We can only advise the purchase of any of good railway and industrials on any recessions."

T.A. Mcintyre & Co., New York, say: "

ie list and ranged from 1 to nearly 2 plnts, under the lead of St. Paul, Readge, New York Central, Metropolitan, melters, Northern Pacific and C. & N. with Illinois Central going up 4 plnts. The situation and outlook from ar point of view is in favor of a furger gradual improvement in the general arket."

arket. Dick Bros. New York, say: "The maret was active and fairly strong today,
entiment was builtsh and the profesonal interests were more inclined to
the a positive position on the buying
de. Crop news was rather better and
te Erie second preferred dividend creted a favorable impression. Numerous
ooks moved up a full point above
fednesday's closing. In the atternoon
te market became dull, but it held very
ell and was decidedly strong at the
ose."

Grain and Provisions.

CHICAGO, July 27.—The wheat market opened firm with September 460% of \$1.60 % of the Northwest was the principal reason for the initial firmness. Another factor was a fair advance at Liverpool. The rain in the spring wheat territory was generally supposed to favor the spread of the much feared black rust.

The strength at Liverpool was said to be due to reports of damage to the Russian crop. As a result of weather bureau 100 91 91 91 9115 1,500 485, 4854 4854 200 1095, 1005, 1005, 29,300 345, 34 34 19,000 1095, 1025, 1035, 360 34 34 34 100 1065, 1065, 1055, 000 13 185, 1554

predictions of rain tomorrow throughout Minnesota and the Dakotas, an active demand developed from commission houses and caused prices to advance above the opening level. September touching 87½c. Toward the end of the first hour, however, the market became quite weak. A sharp break in corn was partiy responsible for quite liberal profit-taking in wheat and started wheat prices downward. In addition, crop news from wheat in the Northwest, while conflicting, furnished much encouragement to bears many advices asserting that black rust liad dono little damage thus far. On the reaction September sold off to \$55c. The weakness was short lived. Shorts soon began to buy freely again. In response to the improved demand prices rallied quickly. One reason for the renewed activity among shorts was a competitive decrease in primary receipts. An advance of \$1c to le in the price of cash wheat at Southwestern markets helped to strengthen the option market here. September closed firm at \$55,435c, a

cash wheat at Southwestern markets helped to strengthen the option market here. September closed firm at 85%487c, a gain of 1/2c.

Heavy liquidation by prominent longs caused weakness in the corn market. The close was fairly steady; September, %47%colower at 3c.

Weakness in corn resulted in renewed liquidation of cars and the market was inclined to weakness. September closed to down at 2314c.

Provisions were firm. At the close September pork was up 10c at \$12.15; lard was up 746; lice at \$7.20; ribs were 59774c higher at \$7.92497.95.

Soon Be a Luxury

An Advance of \$1 a Case Will Go Into Effect Early Next

It is denied that there has been a combination formed between the beer men and the commission men, but the cost of lemonade will continue to go up. An advance of 11 a case, continue to go up. An advance of \$1 a case, from \$7 to \$8 for lemons will go into effect next week. Just at presentative is no danger of a famine, as two cars of the fruit came in yesterlay from California. Lemons are higher than they have been for years and the only explanation is that the Eastern dealers have been unable to supply themselves in the usual markets and are estiming to California for their stock. Italy, Mexico and Florida are among the scurces of supply. So far as known the crops have been normal in these regions, therefore it is presumed that increased consumption during the hot weather has much to do with the advance.

sumption during the hot weather has about do with the advance.

New potatoes are becoming so plentiful that the prices are weakening and a good quality can be had for 20 cents a peck. Tomatoes are also responding to the demands of the housewives and there is a decline of about 5 cents a pount in the price. In the fish market there have been some changes in wholesale prices, but the retail rates are about the same. Sea base may be had a little cheaper than heretofore. Following are the latest quotations:
